MEMORANDUM FOR:

SUBJECT:

Project Termination.

1. It is recommended that Project [ ] (Quality Inspection Table) be terminated for lack of interest. The first proposal (# 62-65) hand carried in by an [ ] representative has been evaluated together with two others [ ]. Also obtained and investigated was the work-statement as prepared by RADC for their existing contract with [ ] for the fabrication of a prototype. All this information was furnished TID. The work-statement has since been mislaid by TID - and no resultant requirement for such equipment has been forthcoming from ~~this~~ <sup>that</sup> organization.

2. The instrument being designed for RADC requires a one micron clean area - as yet unattainable in the building - and is for inspection and evaluation of the ON - a requirement that I feel belongs under NRO [ ] and not under NPIC.

3. Verbal concurrence on termination of this project was obtained from TID/TSB [ ] on 31 August 1965.
